

DRAINBASE

Water-buffering support system

for synthetic turf projects in landscaping, roof terraces and playgrounds

INFO

- + Optimal load distribution
- + Manufactured from HDPE material - high elasticity, even in cold temperatures
- + Water buffering capacity of 30 liters/m²
- + 9 flexible zones maintain contact with the surface
- + Anti-slip system to ensure that the artificial turf stays in place.
- + Unique connection system allows the plates to shrink and expand within their own dimensions, both during installation in cold and at warm temperatures
- + Cost efficient: avoid complex foundation works and save time and costs

TECHNICAL SPECIFICATIONS

- + DIMENSIONS TILE 60 x 60 cm = 0,36m²
- + HEIGHT 3 cm
- + MATERIAL 100% recycled HDPE and 100% recyclable
- + COLOUR Black
- + WATER BUFFERING CAPACITY 30 LITERS / M²

APPLICATIONS

- + Artificial turf in landscaping and for playgrounds
- + Well-suited for roof terraces

INSTALLATION ACCESSORIES

- + Fixing caps and screws
- + Drainbase borders available
