

ECCODAL

Frost-resistant grass grid made from recycled material

Made from 100% recycled material, the grass grid has internal expansion joints that absorb thermal and mechanical tensions.

INFO

- + Manufactured from 100% recycled material (mix PE-PP) ensuring compressive strength and durability
- + Quick and easy installation due to large dimensions of 80 x 80 cm.
- + Creates a stabilised surface for both walking and driving
- + European quality product
- + Expansion joints which ensure stability in a range of temperatures

TECHNICAL SPECIFICATIONS

- + COMPOSITION - 100% RECYCLED MATERIAL (MIX PE-PP)
- + HEIGHT OF 4 OR 5 CM
- + DIMENSIONS 80 X 80 CM (0,64M²)
